All claims pending thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided in the paragraphs, which follow below.

REASONS FOR ALLOWANCE

Claims 1-8 are allowed.

The instant application is deemed to be directed to a nonobvious improvement over the invention of Wells (U.S. 3,804,620), as being a representative example in the art to which the instant invention pertains. In particular, the primary reason for allowance is directed to surface of the charged particles, the dispersion medium and a surface of an inner wall on which the charged particles are to be deposited satisfy the conditions (A)-(D) regarding the respective combinations of being hydrophilic, hydrophobic and lipophobic (Claim 1, lines 11-24), which in the examiner's opinion, would not have been obvious to one of ordinary skill in the art.

The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

OTHER REMARKS/INFORMATION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
